

Line Up Visual Card

Summary: Visual to reinforce or replace the verbal direction to line up.

When to use:

- Use to replace or reinforce verbal directions.
- Use to quickly and quietly redirect a student.

Tip: Make sure that the student is able to 'line up' before using this visual. A student must be taught how to line up before a visual will help them remember to line up.

How to use:

1. Use the cue card to visually reinforce verbal directions, or as nonverbal reminders.
2. Be sure the student can see the cue card.

Tips:

- *Use a photograph of the student lining up instead of a line drawing to increase student ownership and understanding of the desired behavior.*
- *Keep several cue cards on a key ring or lanyard for easy access to commonly used directions during student interactions throughout the day. See [Behavior Cue Cards](#) for an example.*
